

Andrés Felipe Esguerra Restrepo

Software Engineer

@afesguerra@outlook.com

afesguerra.github.io

SUMMARY

I like to get involved with every aspect of the product's lifecycle, from development to delivery. I believe technology can have a positive impact on society and I'm working everyday to make it happen.

EXPERIENCE

Full Stack Engineer

Aflore

June 2016 - ongoing

Using Python 3 and EmberJS I build new feature's into the main platform of the company

Graduate Assistant

Los Andes University

Aug 2014 - Aug 2016

Built a model-based software generator that can create a web application with security, tests, CI configuration and almost no technical debt in just a few seconds. Also built an AngularJS library with custom directives to ease the development.

Customizations Engineer

Open Systems

July 2012 - June 2014

Build custom features for specific customers. I worked primarily with PLSQL and sometimes with C#. Eventually dedicated to one customer and worked as a DevOps engineer.

EDUCATION

M. Sc. Software Engineering

Los Andes University

Aug 2014 - ongoing
